

A New Spa Category, Before It's on Every Property's Menu

Hydrogen Bath Therapy is a genuinely new full-tub immersion modality — not a repackaged existing treatment. For your clients, the value isn't the novelty itself. It's what the novelty does to three numbers you already build into every wellness recommendation.

THE CASE, IN ADVISOR TERMS

ADR & RevPAR

A category no nearby competing property currently offers supports premium, top-of-menu session pricing — and gives a client a genuine "first in the region" story for press and wellness-editorial coverage, not just another line on the treatment menu.

Staffing Economics

Full-tub saturation in 3–5 minutes, with zero therapist labour to operate. Revenue added without headcount added — a modality that improves the margin structure you're already modelling for the client, not just the guest experience.

Differentiation

The milk-white, opalescent water is a genuinely photographable, shareable moment — distinct from the infrared sauna or cold plunge a guest has already seen at three other properties this year.

FITS INTO WHAT YOU'RE ALREADY ADVISING ON

Retrofits, not rebuilds — compatible with existing hydro rooms, private spa suites, and wellness zones. No structural modification, no plumbing changes. Addable to a property you're already advising on, not a ground-up build.

Sequences into an existing circuit — pairs naturally between sauna, cold plunge, and hydrogen inhalation stations in a hydrotherapy programme you may already be designing.

Session-ready turnover — matches existing spa scheduling models; no redesign of booking or staffing systems required.

THE HARDWARE — WZ-1 HYDROGEN BATH SYSTEM

SATURATION	Full-tub hydrogen saturation in 3–5 minutes
TECHNOLOGY	PEM / SPE membrane electrolysis, physical gas separation
PURITY	99.991% — independently lab-verified
OUTPUT	Zero ozone · zero chlorine · zero HHO by-products
INTEGRATION	Standard single-phase power; no structural modification

WHAT WE HANDLE SO YOU DON'T HAVE TO

Technical specification support, staff training resources, and commercial/procurement assistance are provided directly to you and your client — recommending this modality doesn't add project-management burden to your scope.
