HERO Clinic Series

Specification sheet · HERO Clinic 6000 · 8400 · 12000

Up to 4 users · up to 8,000 ml/min hydrogen

High-output hydrogen systems for clinics, spas and wellness centres. Four hydrogen outlets let up to four people share a session.

- **PEM electrolysis:** N115 perfluorinated proton-exchange membrane; hydrogen and oxygen produced as separate streams
- **Twin 3 L water tanks**, dual touchscreen control panels
- **Aluminium housing** on castor wheels

General wellness devices. Not FDA-approved; no medical claims are made.

Model comparison

Specification	HERO Clinic 6000	HERO Clinic 8400	HERO Clinic 12000

Operation and care

1. **Placement:** on its castors near a power outlet, in a ventilated room. No plumbing is needed.
2. **Water:** fill both 3-litre tanks with distilled or RO-purified water only. Tap water damages the electrolysis cells, and that damage isn't covered by the warranty.
3. **Between clients:** cannulas are single-client consumables; wipe down the housing after each session.
4. **Extended shutdown:** drain both tanks first.
